

Der er indbygget en knap i WISEflow fra de studerendes side af. Den vises først når den afleverede opgave er tjekket i Urkunds database. Typisk et par timer efter. Efter 3 timer burde den være klar.

1. Besvarelse

Se den officielle forside

I WISEflow bliver afleverede besvarelser automatisk kontrolleret for plagiering. Besvarelsen bliver samtidig gemt i databasen, hvorved det fremover kan kontrolleres, om der plagieres afsnit fra denne besvarelse i andre sammenhænge.

Som forfatter til besvarelsen kan du fritage din besvarelse for dette ved at klikke på denne knap. Din besvarelse vil dog i sig selv stadig blive tjekket for plagiering.

Det vil sige at de studerende har mulighed for at fritage opgaven fra at blive gemt i Urkunds database, men deres egen rapport bliver selvfølgelig kontrolleret for plagiat..

Klikker man på knappen kommer man videre til Urkund med denne side:

Exemption status

D16409613 - 1225252.pdf

Your document is not exempted from use as reference material.

If you click the button below your document will only be available to the organisation to which it was originally submitted.

Exempt document

Exemption

Normally documents are searchable as comparison material for documents sent in by other students.

By agreeing to the indexation of your work in the archive, you make it harder for others to copy and reuse your work.

As copyright holder you are well within your rights to exempt your document from being used as a source for comparison in the URKUND system. If you exempt your document from searching, your document will still be stored for the sake of your educational organization and checked for plagiarism, but it will not be used as a source when other students submit their documents for analysis - and it will not be searchable through the URKUND system - outside the organisation from which the document originated.

Exempting a document also means that your document will not be protected from being plagiarised by other students.
